Join the most exciting Learning Programme in steel! **steelChallenge** invites you to venture yourself on an immersive learning journey, where you can explore the production and refinement of steel in a unique and exciting way.

What is steelChallenge?

steelChallenge is a revolutionary game-based blended learning programme that attracts thousands of talented students and professionals from the steel sector every year. Through interactive 3D models, videos, online courses, and masterclasses by our network of experts, you will have the opportunity to delve into the fascinating world of steel.

Discover your potential

In **steelChallenge**, you will not only learn about the production and refinement of steel but also develop key skills for the future: digital transformation and sustainability. Our advanced steel manufacturing simulators will challenge you to apply your knowledge and skills in a realistic virtual environment.

The Championship

steelChallenge takes place annually in two rounds and two categories across five regions worldwide. The first phase is the Online Regional Championship, where you will have the opportunity to interact with our steel manufacturing simulator and compete with other participants to produce the required steel at the lowest possible cost. The winners from each region and category will be invited to the thrilling World Championship, held during the worldsteel Extraordinary General Assembly. Just imagine being face-to-face with global steel leaders!

Explore our Learning Solutions

As a participant in **steelChallenge**, you will have exclusive access to our Learning Solutions Directory. Here, you can take e-learning courses, attend live masterclasses, interact with 3D models, and practice with our simulator. You will be able to expand your knowledge and network with industry professionals.
