asking information about working at
P&G, recruitment process, CV etc

DAY 1.

R&D Internship – Associate Scientist **Brussels Innovation Centre, Belgium**

Are you passionate about the science behind products? Do you want to develop innovations for the world's biggest brands? Then a technical career at P&G could be what you are looking for!

Join us for an internship and you could soon leave your mark in fields like natural sciences, materials, automation, sustainability, analytics, simulation, and modelling through your project.

Our internship normally runs for 4-6 months, but we also offer internship/placements/thesis for longer periods (up to 1 year) and at different times of the year.
